## SS Global Study Trip in the UK (Day 4)

«Today's plan»

1. The museum of London
2. A stroll in London

«Activity Report»

We first visited the Museum of London to know about the city. At the museum, we first saw a lot of exhibits of geological content and we learned how the city came to be. We also saw some exhibits that showed us the change of residences in London and we were surprised to know how rapid the progress of British civilization was.

Furthermore, Great Britain has a long history, and people have experienced many problems such as black death and great fire of London. But each time people devised solutions such as new chemical treatment and the practical urban planning, which were the most advanced in the world.

Through today's study tour, we learned that people in London achieved the industrial revolution by making use of their experience.

The museum of London
